

Take Control of Your Enterprise Printing

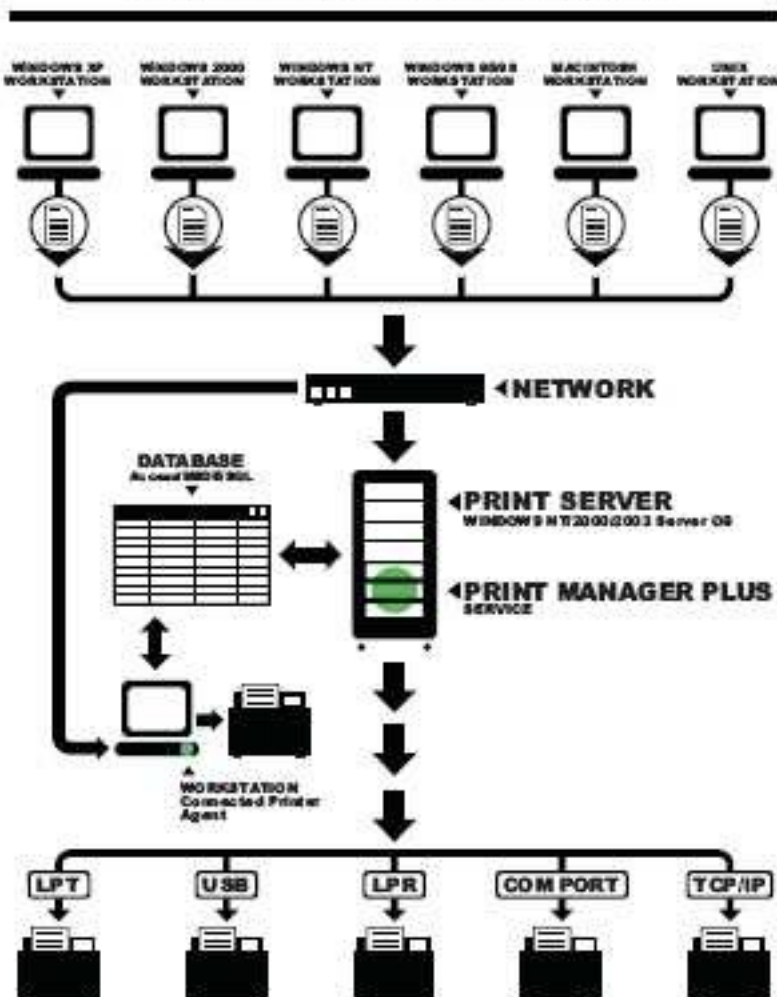

How much are you spending on printing? How many printers does your enterprise own? How many pages are printed each day? Do you have employees using expensive colour printers for everything they print? Try to add up the cost of paper, toner, ink cartridges, maintenance, equipment wear and tear and you begin to get the picture!

Printing Can Cost Up to 15 Percent of Annual Revenues Dataquest figures show that the average cost of producing documents is equivalent to 40% of a company's labour cost. Other industry analysts estimate printing to run between five and 15 percent of a company's annual revenues. Despite this huge expense and its impact on profits, most corporations just view it as "the cost of doing business" since it's impossible to control without the right information and tools.

The Complete Print Management Solution

Print Manager Plus® allows you to quota and track all printing activity on any Windows® network. It tracks pages being printed from all Windows versions from 95 to Vista and Version 7, plus DOS, Macintosh, UNIX (all flavours), and OS/2 clients for a complete print management solution. Now, you can take control of these valuable printing resources. No more wasted budget from "out of control" printing. You'll be amazed how much you can save by just tracking this outflow.

Print Manager Plus - Print Server Setup Schematic

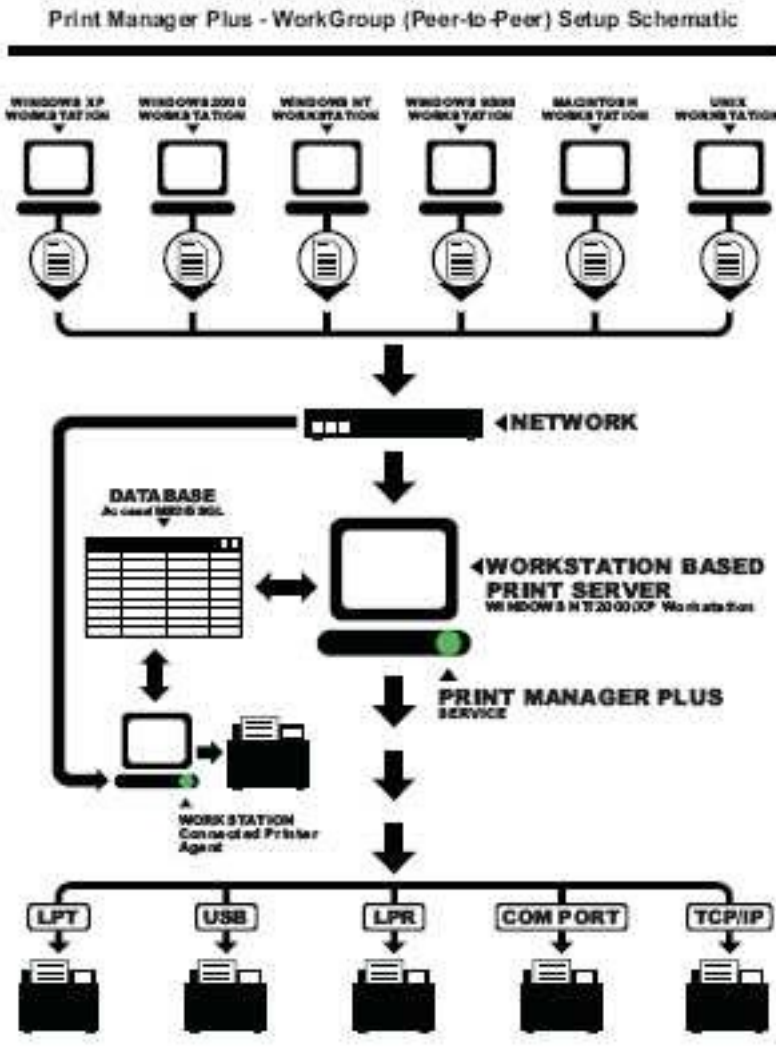

Pays For Itself Within 10 Days

It was written from the ground up as a native application and service. Print Manager Plus installs in seconds on any Windows print server and is so cost effective it often pays for itself within 10 days. If you run on budgets and especially if you are responsible for printing, you need Print Manager Plus.

Key Features:

- Tracks, controls and reports printing usage and costs across networks.
- Budget or restrict users by dollar amount, number of pages per job, job size and file type.
- Restrict printers by number of pages per job, job size and file type.
- Complete cost reporting and usage accounting.
- Client Billing Module available.
- Microsoft logo certified print management tool.

What Customers have said

"For some of our printers (the expensive dye sublimation ones, for instance), we charge for usage... [Print Manager Plus] helps us track usage and generate billing info. I am extremely satisfied with Software Shelf's products. They work as advertised and get the job done with little fuss."

"PMP has been a great find... There's lots of interest — everyone one of us is or will face the educational issues of responsible use of limited resources. PMP is one very good technological helper to do so."

"In an open academic environment printing costs can quickly spiral out of control. With Print Manager Plus, we

System requirements

Supports print servers with Windows NT, Windows 2000 Server, Windows 2003 Server, Windows 2008 Server, Windows XP, Windows Vista, Windows 7

Supports Microsoft Access or Microsoft SQL 7.0/ 2000/ MSDE/2005/2008/ Express

have been able to curb our over-zealous users with a simple, cross-platform solution." "... it [Print Manager Plus] has not only paid for itself several times over in terms of paper, toner, and maintenance costs, but has assisted us greatly in managing our printers... our university's paper consumption is half of what it used to be."

Reviews

"The software worked well for me and seems to be relatively easy to configure and use. It's a perfect complement to Windows' built-in printer management features... In larger organisations, though, the software licenses will tend to pay for themselves because organisations using Print Manager Plus will save money each month as excessive printing is gradually reduced." *TechRepublic*

"Businesses with runaway printing costs could certainly benefit from Print Manager Plus." *Windows & .NET Magazine*

"Overall, I found Print Manager Plus very easy to install and manage... for schools, universities or facilities houses which charge for a service it could be a real boon. Recommendation is mandatory." *PC-Pro Magazine*
