

# EMC® Retrospect® 8 for Macintosh

## Backup Software Comparison

EMC Retrospect 8 is designed especially for the data protection needs of small and midsize businesses, distributed enterprises (such as remote/branch offices), small/home offices, and individual professional users. This is reflected in EMC Retrospect's feature set and pricing, which position it between Time Machine on the low end and enterprise-level backup software, such as BakBone NetVault for Mac on the high end.

The table below shows how EMC Retrospect compares to other Macintosh backup and recovery tools.

	Features	Apple Time Machine	EMC Retrospect 8	BakBone NetVault 7
Positioning and Usage	Est. Street Price	Free	\$85-\$1,250	\$1,400+
