

PeerSync PSObserver, Version 2.0.2

To upgrade, double-click on the installation file (obs20.exe) in the Explorer window, or choose "Run" from the Start Menu and then select the application.

If you are upgrading the current version of PSObserver (2.0.1 to 2.0.2) simply install the application over your existing PSObserver and the previous version will be backed up in a sub-folder called 'BACKUP' (if the option to keep a backup is selected during the installation).

If you are evaluating a new version of Observer 2.0 and you already have an existing copy of Observer 1.0 or older, please select a new directory during the installation.

Note: For more information on the latest features and how to implement specific scenarios please go to: <http://www.peersoftware.com/support/peerutilities.aspx>

Fixes/Enhancements

ID	DESCRIPTION
464	Fixed an issue where the Observer would incorrectly show the "Accessed By" information. Instead of showing the name of the user who had the file opened it showed the account under which PeerLock was running.
710	Fixed an issue where the Peer logo would not be displayed in the About screen when starting the Observer. This would only occur when the product was registered.
439	Updated the Status Display and About Screen text colors to Navy so that it does not appear washed out on Vista.
