

### Goal:

To generate an e-mail report with Job based synchronization summary information.

*This would be a useful feature if you wish to receive an e-mail after every synchronization to inform you of the synchronization outcome (if successful or not).*

---

### Following are the different Options available for this particular Argument

#### **PARAM I- JOBSTATSUMMARY**

*This Option will include the Job statistic summary in the e-mail. Information would be included such as:*

*Number of files added, deleted, and updated. Individual files events will also be included.*

#### **- "String to print in body content"**

This would replace the JOBSTATSUMMARY with the content from the string.

#### **PARAM II- ONLYONFAIL**

*This Option will send the report by e-mail or only if the synchronization failed.*

#### **- ONLYONSUCCESS**

*This Option will send the report by e-mail only if the synchronization was successful.*

**SEE BELOW FOR THE DIFFERENT OPTIONS COMBINATIONS AND THEIR MEANING.**

---

### Use the following Format to setup a LOGEMAIL

#### **LOGEMAIL OPTION (S)**

*Examples:*

#### LOGEMAIL JOBSTATSUMMARY

This entry will generate an **E-mail Report** to be sent through the *e-mail configuration\** setup in the E-mail Reporting Screen.

This log will include **Summary Information** of the specific Job synchronization.

#### LOGEMAIL "Job has completed"

This entry will generate an **E-mail Report** to be sent through the *e-mail configuration\** setup in the E-mail Reporting Screen.

The e-mail will include "**Job has completed**" in the body of the specific Job synchronization e-mail.

#### LOGEMAIL JOBSTATSUMMARY ONLYONFAIL

This entry will generate an **E-mail Report** to be sent through the *e-mail configuration\** setup in the E-mail Reporting Screen.

The e-mail will include **Summary Information** of the specific Job synchronization.

The e-mail will be sent **only if** the specific Job synchronization **has not completed successfully**.

#### LOGEMAIL JOBSTATSUMMARY ONLYONSUCCESS

This entry will generate an **E-mail Report** to be sent through the *e-mail configuration\** setup in the E-mail Reporting Screen.

The e-mail will include **Summary Information** of the specific Job synchronization.

The e-mail will be sent **only if** the specific Job synchronization **has completed successfully**.

- **TO SETUP THE E-MAIL CONFIGURATION FOR LOGEMAIL:**

1. Go to **Reporting → E-mail Reporting**.
2. Click on **Create Administrative E-mail Messages**.
3. Click on the button **E-mail Configuration**.
4. Fill in all the necessary e-mail configuration information.
5. Click **OK**.
6. You may choose to **attach the Log file** to the e-mail if you wish.
7. Now **Uncheck Create Administrative E-mail Messages (VERY IMPORTANT)**.
